

29 Mar 2015: Preached by Preacher Ko Lingkang

Topic: **Creation versus Evolution**

Scripture Text: Romans 1:18-25

1. The 2 major world views on creation and evolution are opposing views. They have been debated over the years with their own evidences. The Bible will tell us the implications of each view.
2. Evolutionist believes in a world that came with a Big Bang some 13.8 billion years ago. The biological process of evolving species lead to human forms today. The theory is based on time and chance for it to happen. There is no God in the entire process. Evolution explains the how we are here but not the why.
3. Creationist believes that God created the world in 6 days. God told us in His Word. All things were created by the power of God. Man is created unique as God gives man a living soul and he is created in the image of God. Man was given dominion to rule the world. Creation explains both the how and why we are here. Man is created to glorify God.
4. The implication taught in the Bible is that there is no excuse for man to deny there is a God. Nature and her design clearly demonstrates the existence of God and it is not by chance. Those who deny it actually hold the truth in unrighteousness.
5. To believe in evolution also implies that there is no higher moral truth and no accountability to any Higher Being. One can do what he likes. But the truth taught in the Bible is that it is appointed unto man once to die and then to face the judgement of God. Let us fear God and come to seek and trust in Him through the Lord Jesus Christ.
